Labels & kickers UPPERCASE

USAGE

DO

- + Orange for CTAs, accents, and the logo.
- + Navy (#1F1A36) for headings and body.
- + Purple sparingly - a second accent.
- + Generous white space; clean cards.

DON'T

- Recolour or stretch the logo.
- Bake the tagline into the logo lockup.
- Use bright orange for small body text on light.
- Add shadows or effects to the mark.

VOICE

Confident, warm, specific - like a person who knows the subject, not a corporate brochure. Be concrete ("document AI that answers in Swahili" beats "innovative solutions"). Avoid value-words: innovative, world-class, seamless, cutting-edge.
